ITAR & EAR

with a focus on

Export Control Reform

If your company is active in—or considering entering—the defense, aerospace, automotive, software, IT, or telecommunications industries, join MILLER CANFIELD lawyers Joseph D. Gustavus and Jeffrey G. Richardson as they discuss

- Overview of International Traffic in Arms Regulations (ITAR) and Export Administration Regulations (EAR)
- Discussion of military items moving from the ITAR's USML to the EAR's CCL 600 Series
- Impact of lesser controls for "specially designed" under the .x 600 Series and .y 600 Series items
- Specific review of EAR 600 Series impact on Ground Vehicles, Aircraft and Gas Turbine Engines
- Method of review for the 600 Series Items
- Overview of additional 600 Series items including Vessels of War and Special Naval Equipment, Auxiliary Military Equipment, and Submersibles

Export Control Reform is designed to place higher fences around the items deserving the greatest protection, while permitting the export of less sensitive items to less sensitive destinations without restriction. The transfer of less sensitive items to the more flexible Commerce Control List creates new opportunities for knowledgeable manufacturers and technology companies.

SPONSORS

- Region 5 Procurement Technical Assistance Center
- Michigan Small Business Development Center
- The Northwest Michigan Procurement Technical Assistance Center
- The Northeast Michigan Consortium Procurement Technical Assistance Center

These Procurement Technical Assistance Centers are funded in part through a cooperative agreement with the Defense Logistics Agency.
